Subject: Rancho Palos Verdes Employee Association

The City of Rancho Palos Verdes today received a petition for recognition of an employee association formed to represent a group of its employees in their relations with the City. Local government employees have the right to form employee organizations for purposes of representation on all matters of employee-relations under California's Meyers-Milias-Brown act. A local public employer in California may not unreasonably withhold recognition. The City is presently reviewing the petition and will respond as required by law.

The City Manager and the entire management team respects the employee's right to organize and looks forward to the continued collaborative effort to carry out the goals of the City Council and serve the needs of our residents into the future.
