

## SAN RAMON CANYON/25<sup>TH</sup> STREET STABILIZATION PROJECT

Web Update November 17, 2011

In accordance with the National Environmental Policy Act ("NEPA"), with the California Environmental Quality Act ("CEQA") and the CEQA Guidelines of the City of Rancho Palos Verdes, City Staff has analyzed the proposed project for the San Ramon Storm Drain Improvement and Emergency Slope Stabilization Project. After reviewing the Initial Study and any applicable mitigating measures for the project, City Staff has determined that this project, as mitigated, will not have a significant effect on the environment. Accordingly, a Mitigated Negative Declaration (MND) has been prepared consistent with CEQA requirements, and a Finding of No Significant Impact (FONSI) has been prepared consistent with NEPA requirements.

These environmental documents have been released for public comments. Further, the City Council will be considering the associated Coastal Permit, as well as the MND and FONSI, at a public hearing on December 20, 2011. Public comments will be received by the City prior to final approval of the Coastal Permit, MND and FONSI through December 16, 2011.

Please click on the links below to view a copy of the Public Notice and the MND/FONSI document. The documents for the San Ramon Canyon Storm Drain Improvements and Emergency Slope Stabilization project are also available at the Public Works Department and the Community Development Department at City Hall, 30940 Hawthorne Boulevard, Rancho Palos Verdes. CD's are available for pickup between the hours of 7:30 a.m. and 5:30 p.m., Monday through Thursday, and 7:30 a.m. and 4:30 p.m., on Friday.
